

Environmentally Friendly Electricity

when you prioritise
renewable energy

Thank you for choosing renewable energy

You have chosen Environmentally Friendly Electricity in addition to your electricity agreement. Buying Environmentally Friendly Electricity makes the production of renewable energy more attractive as you buy electricity from renewable sources.

Energi Danmark offers:

- > Environmentally Friendly Electricity from wind turbines
- > Environmentally Friendly Electricity from hydropower plants
- > Environmentally Friendly Electricity from solarpower plants

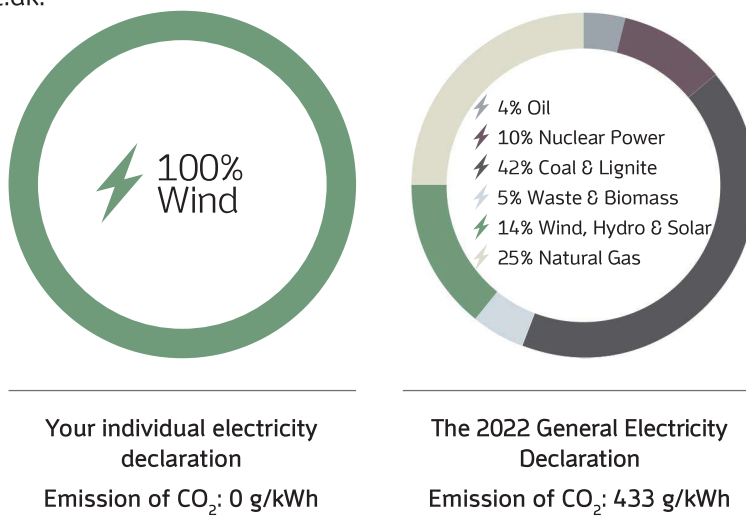

Whether you buy energy that is based on wind, hydro or solar, your company is helping raise the demand for renewable energy. Your purchase includes guarantees of origin that correspond to your consumption. This ensures that the amount of electricity used by your company is covered using energy from renewable sources.

If you buy guarantees of origin that correspond to the entire electricity consumption of your company, your company can call itself carbon neutral.

The purchase of Environmentally Friendly Electricity from Energi Danmark alone does not lead to an increase in the production of environmentally friendly energy. But in the long term, the purchase of Environmentally Friendly Electricity could make it more attractive to produce energy in a way that takes the environment into account.

Energy sources used in the production of electricity

Your company has bought electricity from Nordic wind turbines. The electricity declarations for wind power and general electricity can be found below. The calculations are based on guidelines issued by Energinet.dk.

Proof of purchase of Environmentally Friendly Electricity

Environmentally Friendly Electricity ensures that the guarantees of origin for renewable energy originate from unspecified Nordic wind turbines.

In connection with the auditing of the financial statements, Energi Danmark A/S's auditor, PwC, documents the balance between the Environmentally Friendly Electricity that is purchased and sold.

Company name	Address	Post code	City
AVK Plast	Øster Vedsted Vej 26	6760	Ribe

Energi Danmark A/S hereby confirms that **AVK Plast** has purchased its percentage of electricity consumption as Environmentally Friendly Electricity produced at unspecified Nordic wind turbines in the period between **01.01.2024 - 31.12.2024**

Estimated consumption
4.241.083
kWh

Total CO₂ emissions associated with the purchase
0 g/kWh

The company has saved a total of
1836 t of CO₂
with the purchase

The authenticity of the Environmentally Friendly Electricity is documented by Energi Danmark A/S's auditor, PwC.
